Principals have discretion to impose a higher level consequence for an earlier offense based on the severity of the incident and the age of the student. VI. Face Shields

Plastic face shields that wrap around the wearer's face and extend below the chin may protect a wearer from respiratory droplets spread by others. Unlike with face coverings, it is not known if face shields provide any benefit in controlling the spread of respiratory droplets to others. The CDC does not currently recommend a face shield as a replacement for a face covering. However, employees and students who qualify for an exception under section (I)(A)(5) or III(A)(6) of this procedure may wear a plastic face shield as a substitute for a face coverings.

VII. Scheduled Breaks From Wearing Face Coverings

Consistent with the 2020-2021 school year, school administrators and teachers will have the discretion to designate short mask break periods throughout the school day.
