

We Learn. We Build. We Play.

After School

WINTERGREEN ELEMENTARY

COME BUILD WITH US.

Thursdays 2:50-3:50pm at Wintergreen!

Session 2: November 3 - January 5

FORCES OF NATURE

Fasten your seatbelts, we're in for some wild weather! This unit is all about the amazing and powerful forces of nature, as students explore the when, where, how and why of all kinds of natural phenomenon. There is a lot of geography in this unit -- we'll examine a map of the Pacific "Ring of Fire" where most tsunamis occur, view a diagram of the tectonic plates and learn how their movement creates earthquakes, define the area known as "Tornado Alley" in North America, and find out what hurricanes are called in different parts of the world. These lessons are designed to improve your child's understanding of the forces of nature, while taking care not to alarm. Each model represents the motion of that particular weather or event.

Session 3: January 12 - February 16

INTERESTING INVENTIONS

Most objects we use on a daily basis were invented by someone. Find out the origins of things like the hand mixer, windshield wipers and conveyor belts. During this unit, students will discuss the difference between an invention and a discovery, learn how inventions solve problems, and find out how inventors get their ideas patented.

Cost: \$50.00 per session
