Zscaler

What is Zscaler?
- Zscaler is an internet web filter that protects students from harmful content on the internet.

- Devices issued by Pitt County Schools are all configured to use the Zscaler service, even when taken home or used on any non-PCS network.

- Students might get a Zscaler login page when trying to access certain websites.

- The login feature cannot be disabled and is required by Federal law.

What do you do when the Zscaler screen pops up?
- Students will login with their email address and network password to proceed. The username is the entire email address.

- Email addresses and passwords are provided to students by their teachers.
