# **SAFETY DATA SHEET**

1

AF79

| Section 1. Identification                                  |  |  |
|--|--|--|
| GHS product identifier                                     | : <mark>AF79</mark>  |  |
| Other means of identification                              | : Not available.   |  |
| Product type   | : Liquid.  |  |
| Relevant identified uses of                                | the substance or mixture and uses advised against  |  |
| Not applicable.  |  |  |
| Supplier's details   | : Betco Corporation<br>1001 Brown Avenue<br>Toledo, OH 43607<br>www.betco.com<br>888-462-3826  |  |
| Emergency telephone<br>number (with hours of<br>operation) | : Chemtrec 800-424-9300 (24 Hour)  |  |
| Section 2. Hazard  | s identification   |  |
| OSHA/HCS status  | : This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200). This chemical is a pesticide product registered by the Environmental Protection Agency and is subject to certain labeling requirements under federal pesticide law. These requirements differ from the classification criteria and hazard information required for safety data sheets, and for workplace labels of non-pesticide chemicals. Please read complete product label   |  |
| Classification of the substance or mixture                 | : SKIN CORROSION/IRRITATION - Category 1<br>SERIOUS EYE DAMAGE/ EYE IRRITATION - Category 1  |  |
| GHS label elements<br>Hazard pictograms                    |  |  |
| Signal word  | Danger (Per OSHA). CAUTION (Per EPA).  |  |
| Hazard statements  | : Causes severe skin burns and eye damage (Per OSHA). Causes eye and skin irritation (Per EPA).  |  |
| Precautionary statements                                   |  |  |
| Prevention   | : Wear protective gloves: < 1 hour (breakthrough time): disposable vinyl. Wear eye or face protection: Recommended: safety glasses. Wear protective clothing. Wash hands thoroughly after handling.  |  |
| Response   | : IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Immediately call a POISON CENTER or physician. IF SWALLOWED: Immediately call a POISON CENTER or physician. Rinse mouth. Do NOT induce vomiting. IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower. Wash contaminated clothing before reuse. Immediately call a POISON CENTER or physician. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or physician. |  |
| Storage  | : Store locked up.   |  |
| Disposal   | : Dispose of contents and container in accordance with all local, regional, national and international regulations.  |  |
| Date of issue/Date of revision                             | : 3/30/2015. Date of previous issue : No previous validation. Version : 1 1/11   |  |

# Section 2. Hazards identification

Hazards not otherwise classified

: None known.

## Section 3. Composition/information on ingredients

| Substance/mixture | : Mixture        |
|-------------------|------------------|
| Other means of    | : Not available. |
| identification    |                  |

#### **CAS number/other identifiers**

| CAS number   | : Not applicable. |
|--------------|-------------------|
| Product code | : 079             |

| Ingredient name                           | %       | CAS number |
|---|---------|------------|
| tetrasodium ethylene diamine tetraacetate | ≥1 - <3 | 64-02-8    |

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First aid measures

#### Description of necessary first aid measures

| Eye contact                    | : Get medical attention immediately. Call a poison center or physician. Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician.  |
|--------------------------------|---|
| Inhalation                     | : Get medical attention immediately. Call a poison center or physician. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours. |
| Skin contact                   | : Get medical attention immediately. Call a poison center or physician. Flush<br>contaminated skin with plenty of water. Remove contaminated clothing and shoes.<br>Wash contaminated clothing thoroughly with water before removing it, or wear gloves.<br>Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a<br>physician. Wash clothing before reuse. Clean shoes thoroughly before reuse.  |
| Ingestion                      | : Get medical attention immediately. Call a poison center or physician. Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Chemical burns must be treated promptly by a physician. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.                          |
| Most important symptoms/       | effects, acute and delayed  |
| Potential acute health effe    | <u>cts</u>  |
| Eye contact                    | : Causes serious eye damage (Per OSHA). Causes eye irritation (Per EPA).  |
| Inhalation                     | : No known significant effects or critical hazards.   |
| Date of issue/Date of revision | : 3/30/2015. Date of previous issue : No previous validation. Version : 1 2/11  |

AF79

# Section 4. First aid measures

| Skin contact               | : Causes severe burns (Per OHSA). Causes skin irritation (Per EPA).   |
|----------------------------|---|
| Ingestion                  | : No known significant effects or critical hazards.   |
| Over-exposure signs/symp   | <u>otoms</u>  |
| Eye contact                | : Adverse symptoms may include the following:<br>pain<br>watering<br>redness  |
| Inhalation                 | : No specific data.   |
| Skin contact               | : Adverse symptoms may include the following:<br>pain or irritation<br>redness<br>blistering may occur  |
| Ingestion                  | : Adverse symptoms may include the following: stomach pains   |
| ndication of immediate med | dical attention and special treatment needed, if necessary  |
| Notes to physician         | : In case of inhalation of decomposition products in a fire, symptoms may be delayed.<br>The exposed person may need to be kept under medical surveillance for 48 hours.  |
| Specific treatments        | : No specific treatment.  |
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

#### See toxicological information (Section 11)

### Section 5. Fire-fighting measures

| Extinguishing media                            |   |
|--|---|
| Suitable extinguishing media                   | : Use an extinguishing agent suitable for the surrounding fire.   |
| Unsuitable extinguishing media                 | : None known.   |
| Specific hazards arising<br>from the chemical  | : In a fire or if heated, a pressure increase will occur and the container may burst.   |
| Hazardous thermal decomposition products       | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>nitrogen oxides<br>metal oxide/oxides   |
| Special protective actions for fire-fighters   | <ul> <li>Promptly isolate the scene by removing all persons from the vicinity of the incident if<br/>there is a fire. No action shall be taken involving any personal risk or without suitable<br/>training.</li> </ul> |
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.   |

3/11

# Section 6. Accidental release measures

| Personal precautions, protec                          | tiv | e equipment and emergency procedures  |  |
|---|-----|---|--|
| For non-emergency<br>personnel                        | :   | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Do not breathe vapor or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment.   |  |
| For emergency responders                              | :   | If specialised clothing is required to deal with the spillage, take note of any information<br>in Section 8 on suitable and unsuitable materials. See also the information in "For non-<br>emergency personnel".  |  |
| Environmental precautions                             | :   | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air).   |  |
| Methods and materials for containment and cleaning up |     |   |  |
| Small spill   | :   | Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |  |
| Large spill   | :   | Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. |  |

## Section 7. Handling and storage

#### Precautions for safe handling

| Protective measures  | : Put on appropriate personal protective equipment (see Section 8). Do not get in eyes or<br>on skin or clothing. Do not breathe vapor or mist. Do not ingest. If during normal use<br>the material presents a respiratory hazard, use only with adequate ventilation or wear<br>appropriate respirator. Keep in the original container or an approved alternative made<br>from a compatible material, kept tightly closed when not in use. Keep away from acids.<br>Empty containers retain product residue and can be hazardous. Do not reuse container. |
|--|--|
| Advice on general<br>occupational hygiene                          | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.  |
| Conditions for safe storage,<br>including any<br>incompatibilities | : Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Separate from acids. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.                       |

### Section 8. Exposure controls/personal protection

#### **Control parameters**

**Occupational exposure limits** 

None.

# Section 8. Exposure controls/personal protection

| •   | • •   |  |
|---|---|--|
| Appropriate engineering controls              | : If user operations generate dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.  |  |
| Environmental exposure<br>controls            | : Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.   |  |
| Individual protection measu                   | <u>S</u>  |  |
| Hygiene measures                              | : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.   |  |
| Eye/face protection                           | : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles and/ or face shield. If inhalation hazards exist, a full-face respirator may be required instead. Recommended: safety glasses   |  |
| Skin protection                               |   |  |
| Hand protection                               | : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. < 1 hour (breakthrough time): disposable vinyl |  |
| Body protection                               | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |  |
| Other skin protection                         | : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |  |
| Respiratory protection                        | : Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.   |  |
| Personal protective<br>equipment (Pictograms) |   |  |

# Section 9. Physical and chemical properties

| Appearance           |  |
|----------------------|--|
| Physical state       | : Liquid.  |
| Color                | : Clear. Blue.   |
| Odor                 | : Pleasant.  |
| Odor threshold       | : Not available.   |
| рН                   | : 11.5 to 12.5   |
| Melting point        | : Not available.   |
| <b>Boiling point</b> | : Not available.   |
| Flash point          | : Closed cup: >150°C (>302°F) [Product does not sustain combustion.] |
| Evaporation rate     | : Not available.   |
|                      |  |

Date of issue/Date of revision

5/11

# Section 9. Physical and chemical properties

| Flammability (solid, gas)                    | : Not available.   |
|--|--|
| Lower and upper explosive (flammable) limits | : Not available.   |
| Vapor pressure                               | : Not available.   |
| Vapor density                                | Not available.   |
| Relative density                             | : 1.007  |
| Solubility                                   | : Easily soluble in the following materials: cold water and hot water. |
| Partition coefficient: n-<br>octanol/water   | : Not available.   |
| Auto-ignition temperature                    | : Not available.   |
| Decomposition temperature                    | : Not available.   |
| Viscosity                                    | : Not available.   |
|  |  |

# Section 10. Stability and reactivity

| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.           |
|------------------------------------|--|
| Chemical stability                 | : The product is stable.   |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.                      |
| Conditions to avoid                | : No specific data.  |
| Incompatible materials             | : Reactive or incompatible with the following materials: acids   |
| Hazardous decomposition products   | : Under normal conditions of storage and use, hazardous decomposition products should not be produced. |

Other adverse effects : No known significant effects or critical hazards.

### Section 13. Disposal considerations

Disposal methods : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

# Section 16. Other information

Hazardous Material Information System (U.S.A.)

Caution: HMIS® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks Although HMIS® ratings are not required on SDSs under 29 CFR 1910. 1200, the preparer may choose to provide them. HMIS® ratings are to be used with a fully implemented HMIS® program. HMIS® is a registered mark of the National Paint & Coatings Association (NPCA). HMIS® materials may be purchased exclusively from J. J. Keller (800) 327-6868.

The customer is responsible for determining the PPE code for this material.

### Section 16. Other information

Copyright ©2001, National Fire Protection Association, Quincy, MA 02269. This warning system is intended to be interpreted and applied only by properly trained individuals to identify fire, health and reactivity hazards of chemicals. The user is referred to certain limited number of chemicals with recommended classifications in NFPA 49 and NFPA 325, which would be used as a guideline only. Whether the chemicals are classified by NFPA or not, anyone using the 704 systems to classify chemicals does so at their own risk.

#### Procedure used to derive the classification

#### **Directions for Use**

# It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

**GENERAL CLEANING/DEODORIZING DIRECTIONS:** Spray soiled area then wipe clean. Repeat for heavily soiled areas. **DISINFECTION DIRECTIONS:** Preclean prior to disinfection. Apply this product until surfaces are thoroughly wet. Treated surfaces must remain wet for 1 minute for disinfection against bacteria. Follow virucidal or Fungicidal directions when using as a virucidal or fungicidal agent. Wipe dry with a clean cloth, sponge, mop or wiper or allow to air dry. Food contact surfaces must be rinsed with potable water after disinfection. Do not use to disinfect utensils, glassware and dishes. Change this product at least daily or when solution becomes visibly dirty.

VIRUCIDAL DIRECTIONS: Follow disinfection directions for application instructions. Treated surfaces must remain wet for 10 minutes for Herpes Simplex Type 2 and 60 seconds (1 minute) for Influenza A/Hong Kong.

**MOLD AND MILDEW CONTROL DIRECTIONS:** This product effectively inhibits the growth of mold and mildew and the odors caused by them when applied to hard, nonporous surfaces. Follow disinfection instructions. Allow to air dry on surface. Repeat when mildew growth returns.

**FUNGICIDAL DIRECTIONS:** This product is an effective fungicide against Trichophyton mentagrophytes in areas such as locker rooms, dressing rooms, shower and bath areas, exercise facilities, health clubs and spas. Follow disinfection directions for application instructions. Treated surfaces must remain wet for 10 minutes. This product is not for use on medical device surfaces.

### NON-ACID TOILET BOWL AND URINAL

DISINFECTANT/CLEANER DIRECTIONS: Empty toilet bowl or urinal and apply this product to exposed surfaces including under the rim with a cloth, mop, sponge or sprayer. Repeat and allow to stand for 1 minute, then flush. \*KILLS HIV ON PRE-CLEANED ENVIRONMENTAL SURFACES/OBJECTS PREVIOUSLY SOILED WITH BLOOD/BODY FLUIDS in

health care settings or other settings in which there is an expected likelihood of soiling of inanimate surfaces/objects with blood or body fluids and in which the surfaces/objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of Human Immunodeficiency Virus Type 1 (HIV-1) (associated with AIDS).

SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1 ON SURFACES/ OBJECTS SOILED WITH BLOOD/BODY FLUIDS.

**PERSONAL PROTECTION:** Clean-up must always be done wearing protective gloves, gowns, masks and eye protection. **CLEANING PROCEDURE:** Blood and other body fluids containing HIV must be thoroughly cleaned from surfaces and objects before application of this product. **CONTACT TIME:** Leave surface wet for 30 seconds. Use a 1 minute contact time for disinfection against Influenza and bacteria and a 10 minute contact time against all other viruses and fungi claimed.

**DISPOSAL OF INFECTIOUS MATERIALS:** Blood, body fluids, cleaning materials and clothing must be autoclaved and disposed of according to local regulations for infectious waste disposal.
